Start Here - Medicare Lead Tracker

Thank you for your purchase! Here is how to get going in 5 minutes.

What is in your download

- **Medicare_Lead_Tracker_BLANK.xlsx** - your working file (500 lead rows).
- **Medicare_Lead_Tracker_SAMPLE.xlsx** - the same file filled with 40 fictional leads so you can see every formula working.
- **Printables** - 5 pages in US Letter and A4: Daily Call Sheet, Lead Intake Cards (2 per page), Weekly Follow-Up Planner, Turning 65 Pipeline, Lead Source Scorecard.

Open the spreadsheet

- **Excel** (Windows or Mac, 2010 or newer): double-click the BLANK file.
- **Google Sheets**: go to drive.google.com, upload the BLANK file, right-click it and choose Open with > Google Sheets (then File > Save as Google Sheets).
- Apple Numbers opens it with basic formatting; Excel or Google Sheets is recommended.

Daily routine

1. **Settings** (once): adjust your lead sources and product lines.
2. **Leads**: one person per row. Type in the white cells - grey cells calculate by themselves.
3. **Call List**: every morning, call everyone listed (overdue first) and update Last contact and Next follow-up.
4. Add a **date of birth** when you have it - the sheet shows the 65th birthday, the enrollment window (IEP) and how many months until it opens.
5. Monthly: check **Dashboard**, **Lead Sources** (cost per enrollment by source) and **T65 Pipeline** to plan next month.

Follow-up flag colors

Red = Overdue, Yellow = Today, Green = This week. "No date" means an open lead without a follow-up date. Enrolled, Not interested and Do not contact count as Closed. "OK to contact?" = No shows Do not call.

Keep it light: do not store Medicare numbers (MBI), Social Security numbers, medications or health details in the file. Follow your carrier, FMO and state rules for client records and consent to contact. Enrollment-window dates are a planning guide based on the 7-month Initial Enrollment Period described on Medicare.gov; confirm each client's dates on Medicare.gov or with SSA.
